

Connect to the Veterans Administration and Department of Defense

Search for a patient within the Community Health Record portal at CliniSync.

- If that individual has visited the VA or DOD, you will find those records.
- You can find a Continuity of Care Document (known as CCDs) that summarizes recent encounters or visits.
- If you use CliniSync's Query and Retrieve solution, you can connect to the VA and DOD through a special configuration.
- For more information, call 614-664-2600 or email information@clinisync.org

What's in a CCD?

- Problems
- Medications
- Allergies
- Encounter/Visit
- Vitals
- Immunizations
- Providers
- Insurance

Hospital-based CCDs may also include additional sections:

- Advanced Directives
- Discharge Medications
- Clinical Notes
- Social History
- Functional Status
